

About this data: Records are exported from [Dimensions](#) (third-party bibliometric database), filtered to the current VA fiscal year and VA-affiliated orgs. Conference abstracts/corrections are excluded by default. Facility matches are name-based text evidence, not authoritative. ORD portfolio tags are inferred estimates, not official VA data. Citation/RCR/FCR reflect Dimensions' data as of export time. Treat all figures as directional, for internal review only.

Showing 15,308 of 17,000 source publications

Dimensions has no dedicated ORD field, so Broad Portfolio tags are inferred from VA grant award prefixes and service names in funding/acknowledgement text. Actively Managed Portfolio tags are inferred from topic keywords in title/abstract/MeSH terms, but a topic match alone is not funding evidence — an Actively Managed tag is only counted here once the record also carries ORD funding evidence (a Broad Portfolio grant/service, or the portfolio's own name in the funding text). Topic-only matches with no funding evidence are excluded from these totals. Treat all figures as estimates, not an authoritative VA source of truth; PubTracker's own service field is not used as a cross-check because it only covers user-submitted records and is not comprehensive.

PUBLICATIONS

15,308

TOTAL ORD-FUNDED (UNIQUE)

2,632

17%

WITH BROAD PORTFOLIO EVIDENCE

2,632

17%

WITH ACTIVELY MANAGED TAG

531

3%

NO ORD SIGNAL DETECTED

12,676

83%

Adds a corroboration check for the subset of publications also manually submitted to PubTracker. PubTracker only covers user-submitted records and is not comprehensive, so turning this on never changes the ORD numbers above — it only adds an extra section below. Leave it off to keep the Dimensions-only view (the default, unaffected by this feature).

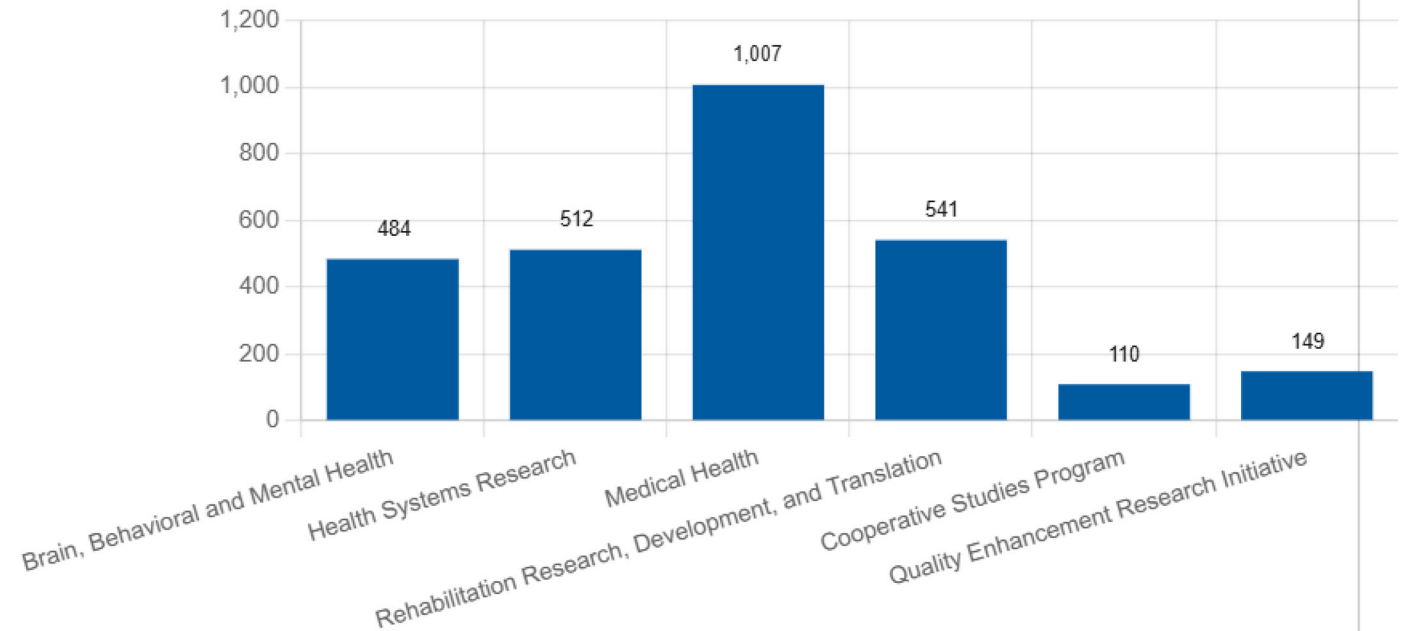

▼ How to read these five numbers

Publications	Total records passing the current filters — the denominator for the four percentages below.
Total ORD-funded (unique)	The deduplicated count of publications with any ORD funding evidence — Broad Portfolio evidence, an Actively Managed tag, or both. Use this number, not the sum of the two categories below, as the true funded total; summing them would double-count publications that carry both tags.
With Broad Portfolio evidence	Publications where we found a VA grant award prefix (e.g., CX, BX, RX, HX) or an explicit VA research-service name (e.g., "Health Systems Research") in the funding or acknowledgement text.
With Actively Managed tag	Publications where the title, abstract, or MeSH terms matched keywords for one of the six Actively Managed Portfolios (e.g., "traumatic brain injury," "suicide prevention") and the record also has ORD funding evidence. Publications that only match the topic with no funding evidence are not counted here — a paper can discuss a topic like suicide prevention with no VA funding tie at all, so a topic match alone is not treated as ORD-funded.
No ORD signal detected	Publications with no ORD funding evidence at all. This is expected to be the majority of records: most publications in this dataset simply have a VA-affiliated author and are not VA-funded research, so there is nothing in the text for our detector to find. A high count here is normal, not a data quality problem.

Interpretation guidance: A publication can have both a Broad Portfolio and an Actively Managed tag or only one — the two "with" categories are not mutually exclusive and will not sum to "Total ORD-funded." Use Broad Portfolio numbers when you need a defensible funding-service estimate; Actively Managed numbers are a narrower view of which funded publications also match a specific cross-cutting topic.

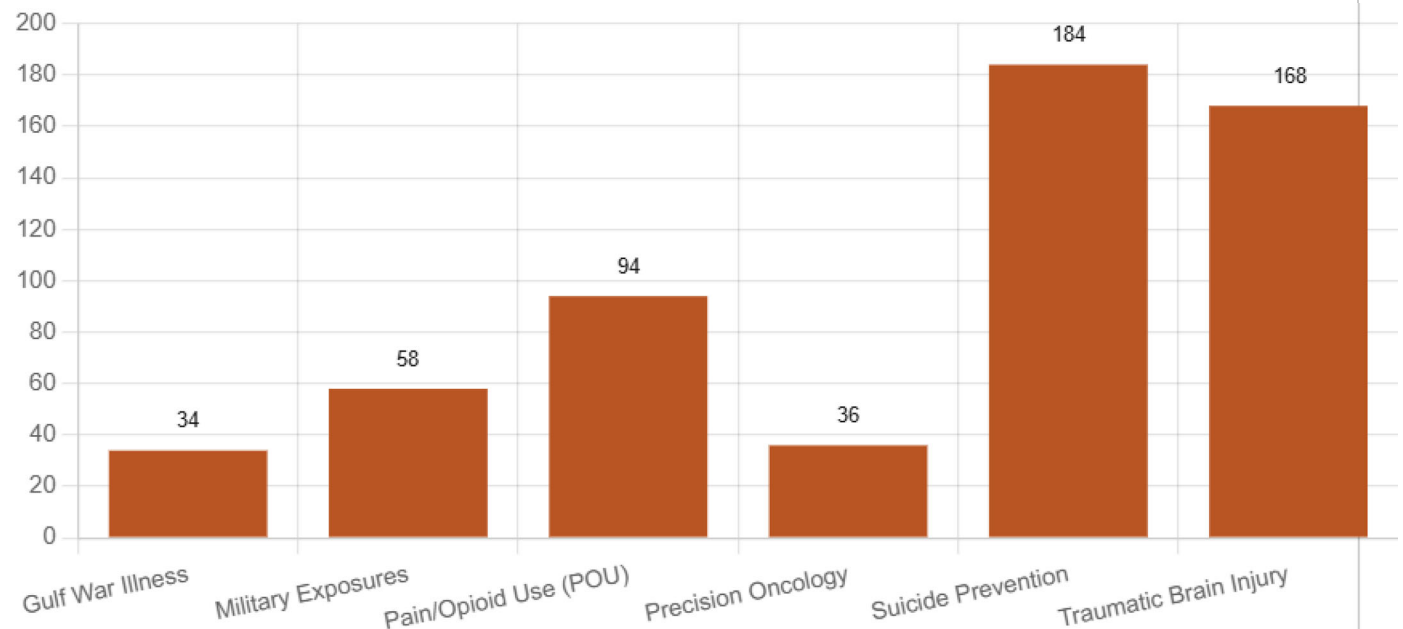

Broad Portfolio (VA funding service)

Count of publications with each Broad Portfolio tag. Bars can overlap (a publication with two tags counts in two bars), so bars will not sum to "With Broad Portfolio evidence" above.

Actively Managed Portfolio (topic)

Count of publications matching each Actively Managed Portfolio's keywords. Same overlap caveat applies — these are topic matches, not confirmed funding.

Broad Portfolio by facility

For publications with both a facility match and a Broad Portfolio tag, counts how many publications link each facility to each portfolio. A publication with multiple facilities or portfolios contributes to multiple rows.

Facility	Broad Portfolio	Publications
VA Boston Healthcare System; Sam Rayburn Memorial Veterans Center (includes Brockton, Jamaica Plain, West Roxbury)	Brain, Behavioral and Mental Health	102
Michael E. DeBakey VA Medical Center (Houston, TX)	Health Systems Research	69
Philadelphia VA Medical Center	Medical Health	68
Durham VA Medical Center; Durham VA Health Care System	Health Systems Research	59
VA Palo Alto Health Care System (includes Menlo Park)	Health Systems Research	57
VA Boston Healthcare System; Sam Rayburn Memorial Veterans Center (includes Brockton, Jamaica Plain, West Roxbury)	Health Systems Research	54
VA Salt Lake City Health care System; George E. Wahlen Department of VA Medical Center	Health Systems Research	52
VA Connecticut Healthcare System (West Haven, CT)	Health Systems Research	49
VA San Diego Healthcare System	Medical Health	48
VA San Diego Healthcare System	Brain, Behavioral and Mental Health	46
VA Boston Healthcare System; Sam Rayburn Memorial Veterans Center (includes Brockton, Jamaica Plain, West Roxbury)	Medical Health	42
Atlanta VA Health Care System; Atlanta VA Medical Center	Medical Health	42
VA Boston Healthcare System; Sam Rayburn Memorial Veterans Center (includes Brockton, Jamaica Plain, West Roxbury)	Cooperative Studies Program	39
VA Tennessee Valley Healthcare System; Nashville VA Medical Center	Medical Health	37
